ACAAN
Stephen Tucker

Any Card At Any Number - You table a cased deck, then remove a small, thin note-pad from your shirt pocket and ask one person to name any card. Let's assume he says, "The Queen of Spades." You record this on the pad. You next ask a second person to name any number from 1 to 52. Let's assume this person says, "22". You record this too, then pick up the...

Angels May Shuffle But The Devil Still Deals
Steve Mayhew

Steve Mayhew has come up, with what must be the most clever application of the Gilbreath principle, or strictly speaking a principle closely related to Gilbreath's. He achieves with this idea extremely strong poker deal effects. If you are only remotely interested in poker deals, mathematical principles, or in particular the Gilbreath principle, you...

Dark Angel

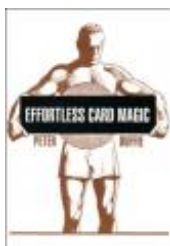

Peter Duffie

This stunning two-part routine has no sleights and nothing to remember except the simple handling, and it leaves the deck ready for a repeat performance. What can you wish more?

After explaining that - not unlike humans - each playing card has a guardian angel that watches over it, you show a 6" x 4" card (can be laminated) that has a full deck...

Effortless Card Magic

Peter Duffie

Effortless is probably just as appropriate or misleading as self-working. It doesn't mean that these tricks don't require any effort on your side. You have to read the descriptions, remember the sequence of actions and perform the act - entertain, which in my book is neither self-working nor effortless. But what these terms try to convey is that you will...

Nu Way Out Of This World

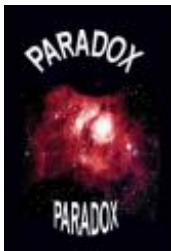

Ulysses Frederick Grant

A wonderful self-working rendition of the classic "Out Of This World" effect. This was the first real card trick I saw - and I was baffled.

A borrowed deck is shuffled. A red and a black card are placed face up on the table. The performer then removes cards, one at a time from the deck. Without the spectator seeing the faces of these cards, he indicates...

Paradox
Stephen Tucker

This is an incredible topological curiosity with a playing card and a third!

Four odd shaped pieces, cut from Bicycle playing cards, are tabled. You explain that three of the pieces marry together to form the shape of a complete playing card. The extra piece is only supplied in case of emergencies (i.e. if you lose a piece!) The extra 'emergency'...

The Last Word on Cards
Rufus Steele

This is certainly not 'the last word on cards'. There never will be a last word on cards. But it is a delightful collection of self-working card effects. Some of the brightest minds contributed: Ed Marlo, Eddie Joseph, Al Leech, Bill Simon, Eddie Fields, Oscar Weigle, Audley Walsh and of course Rufus Steele himself.

You will find the original...
